

New!

Quadro+ V8

8 Stage Heating / Cooling Air Conditioning Thermostat for DIN Rail mounting

The new Quadro+ V8, retains all the features of previous model Quadro units but it has been enhanced to meet the needs of contractors today. It is ideal for simple air Conditioning Control at an affordable price.

Unlike many of the other controllers in the price range Quadro offers digital Temperature Display and simple front panel programming for ease of use by the Contractor and Building owner.

The Quadro+ V8 has many advanced features and can be expanded even further with the addition of an Auxilliary Slave Unit

Advanced Features Of Quadro+ V8

- Unique Digital Temperature Display.
- Simple programming via Front Panel.
- Adjustable Set points
- 2 Stage Heat and 2 Stage Cool standard.
- Unit comes complete with Temperature sensor and enclosure.
- Dual Analog Outputs for 0 to 10 V Damper Control for economising or proportional valves.
- Programmed time delays between cooling and heating stages
- Offers a wide Temperature range -8 to +40 degrees Celcius
- Programmable Set Back Function Available.

When used in conjunction with an Auxilliary Slave Unit the Quadro+ Mark V8 offers more features:

- Up to 4 Heat and 4 Cooling Stage Outputs
- Remote Set Point adjustment (pictured right of the standard wall sensor) in the Room Space to the degree which has been pre Programmed at the Control.
- Offers Dual economising Function either by temperature or enthalpy.

The all new Quadro+ V8 packs a lot of features in a standard DIN profile enclosure, all at a great price
